Do-not-drink advisory

UTILITIES / EDITION 2026-10-02

QUICK ANSWER / START HERE

Use commercially bottled or officially approved water for drinking, cooking, brushing teeth, ice, formula and pets. Do not try to make chemically contaminated water safe by boiling. Read the notice for which other uses are allowed.

Do now.

☐**Read restrictions**

01

Check what contaminant is involved and which uses are prohibited.

☐**Replace drinking water**

02

Use the approved alternative for anything swallowed or used to prepare food.

☐**Check household uses**

03

Bathing, laundry and cleaning depend on the exact local notice.

☐**Wait for clearance**

04

Follow any flushing or filter replacement instructions before resuming use.

Keep the plan moving.

IF HELP IS UNAVAILABLE

Set aside sealed water for drinking, food and medicines, including pet needs. Mark the unsafe taps so nobody uses them by habit. If you have no trusted update, keep using the safer supply; restored pressure or clear appearance does not establish safety.

Watch for.

Clear appearance and normal taste cannot confirm safety.

People & practical needs.

Prevent accidental drinking by children, visitors or people with memory difficulties. Label restricted taps and safe containers

Next decision.

Save the utility notice and alternative-water distribution location offline.
